

HELPS IMPROVE  
CATTLE WELFARE

## TREATMENT COATS

"Coldness really knocks sick cows and calves around, especially if they are recumbent (lying down)..."

"The MIRōTEC Treatment Coat will increase the chance of a successful outcome."

**- Dr. Phil Poulton**

Gippsland Vet Group, Victoria, Australia

# TREATMENT COATS

## COW COAT:

- Useful for sick cows under cold conditions as they respond better to treatment if they are warm.
- For recumbent cows when conditions are cold especially if they are outdoors, as keeping them warm help recovery.
- MIRoTEC Treatment Cow Coat will help improve the welfare of sick cows and recumbent cows under cold conditions.

## CALF COAT:

- For calves suffering from scours, which is often associated with dehydration and low body temperature.
- For sick calves under cold condition, such as pneumonia.
- MIRoTEC Treatment Calf Coat will help improve the welfare of sick calves under cold conditions.

## Why MIRoTEC ?

- MIRoTEC will warm more effectively and more efficiently than conventional coats.
- MIRoTEC actively warm the body rather than conventional coats which do so only passively.
- MIRoTEC actively reflects infra-red radiation (body heat).
- MIRoTEC Treatment Coats are made from heavy duty rip-stop canvas and are fully lined with MIRoTEC.
- 3 adjustable sizes for both cows and calves.
